

e4

Big on style and space, tiny on running costs.
4 seat urban electric car.

e4

Big on style and space, tiny on running costs. 4 seat urban electric car.

The e4 is the only all-electric car capable of comfortably seating 4 adult passengers available in the UK. The open, curved styling provides a spacious interior and the high-level driving position and oversized windscreen gives the driver excellent all-round visibility. The e4 has an astonishing 78 cubic feet of passenger cabin space.

The optional rear-mounted trunk box or stake-back give class leading luggage and load space.

The e4 is the ideal transport solution for families or businesses looking to reduce their carbon footprint. It makes light work of moving people around any business or urban environment and creates a curious crowd wherever it goes making it ideal for use as a promotional vehicle.

GEM batteries are recharged via a mains power lead which plugs directly into the vehicle and any standard 240V socket. Each full charge will power the vehicle for 30 miles*

GEM electric cars are exclusively distributed in the UK by GEM Cars Ltd.
