

eLXD

The white van that's green
LWB electric van.

eLXD

The white van that's green
Long wheelbase electric van.

The eLXD is the heavy duty big brother of the eL and is the perfect solution for businesses that require more power and range with minimal impact on the environment.

With a maximum payload of 630 KG and a 2 cubic metres cargo box option it makes light work of bulky and heavy loads. The open, curved cabin provides a spacious interior and the high-level driving position and an oversized windscreen gives the driver excellent all-round visibility.

The GEM eLXD can be used on-road, off-road, inside buildings, or anywhere the job takes you. Standard features include an upgraded 7.0 hp motor, nine 8-volt maintenance-free gel batteries which give a roaming range of up to 50 miles on a single charge. The eLXD is a great workhorse – move your heavy loads with a light conscience!

The eLXD is recharged via a mains power lead which plugs directly into the vehicle and any standard 240V socket.

Up to 100% corporation tax write-off in year one.
